Introduction

Full-Stack Developer with hands-on experience in MERN stack and ASP.NET development. Skilled in building scalable web applications, REST APIs, and database-driven systems. Passionate about developing efficient backend services and responsive user interfaces.

Education

ST. Mary's H.S. School, 10th	feb 2020
• Percentage: 70	
ST. Mary's H.S. School, 12th	feb 2022
• Percentage: 70	
IPS Academy, B.E. (Computer Science and Information technology)	Nov 2022-2026
• CGPA : 8	

Experience

Mern Stack Intern, Akal Infotech – Indore, MP	15 Jan 2025 – Oct
- I worked as a Mern stack at Akal Infotech, where I contributed to building dynamic and responsive front-end interfaces, optimized component rendering, and collaborated on real-time data integration. - Collaborated with backend developers to integrate RESTful APIs built in Node.js and Express.js. - Designed reusable UI components and ensured mobile responsiveness using Tailwind CSS and Bootstrap.	
NET Developer Akal Infotech - Indore, MP	Oct 2025 – Present
Developed backend features using C and ASP.NET. Worked on APIs, debugging, and performance improvements. Tech: C, ASP.NET, SQL Server, Linq	

Achievements

Runner Up at UDAAN (College level Minor Project Competition)	Apr 2025
Minor Project , <i>Employee Management System</i>	
The Employee Management System (EMS) is a full-stack web application designed to streamline and automate core HR activities such as employee onboarding, profile management and attendance tracking.	

Projects

Excel Data Import System	https://github.com/Talrajsingh/.Net—Excel-Project-
- Developed a web feature that allows users to upload Excel files and automatically store the data into a database. The system reads Excel sheets, validates the data, and inserts records into SQL Server, eliminating the need for manual data entry. It also includes file format validation and error handling to ensure only valid data is processed. - Tools Used: : .Net WEB API , SQL SERVER , Excel	
Employee Management System	https://github.com/Talrajsingh/Employee
Employee Management System – Developed a web-based application to manage employee records, attendance, payroll, and performance tracking. Implemented secure authentication, role-based access, and a user-friendly interface for HR and employees. Automated workflows reduced manual processing time and improved data accuracy.	

- Tools Used: Python, HTML, CSS, JavaScript, MySQL ,Django

Auth System

<https://github.com/Talrajsingh/Auth—.net>

- **Auth System** – Designed and implemented a secure authentication module with user registration, login validation, password hashing, and database integration using ASP.NET Core and SQL Server.
- Tools Used: .Net WEB API,SQL SERVER,Linq.

Hotel Management

- **Hotel Management** – Built a modern web application to manage room bookings, guest records, billing, and service requests. Designed an intuitive interface for staff and customers to streamline reservations and check-ins. Deployed the application for global accessibility.
- Tools Used: HTML,CSS,JavaScript,Tailwind,React,Versel

Green Cart

<https://github.com/Talrajsingh/MERN-STACK-FRUIT-WEBSITE>

- – Developed an e-commerce web application using React.js with features like product listing, shopping cart management, and dynamic UI components.
- Tools Used: HTML,CSS,JavaScript,Tailwind,React,Versel

Technologies

Languages: C++ , JavaScript, SQL, HTML, CSS

Frontend: React.js, HTML5, CSS3, JavaScript

Backend: Node.js, Express.js,ASP.Net Web API

Database: Sql, MySQL

Tools & Platforms: Postman, Git, GitHub, VS Code, Versel
